WHAT OUR CUSTOMERS SAY...

Users of the following clinical systems give their opinions of Docmail:

emis

Watling Medical Centre

"We have been using this service for the last 3 - 4 years to send our annual flu letters. From this year, our admin staff have started using it for sending out our monthly children's immunisation letters as well. Very useful and easy to use when sending out generic letters."

Martins Oak Surgery

"We are glad to have discovered Docmail - and we believe that other medical practices should benefit

systemone

ONEPATIENTONERECORD

Launceston Medical Centre

"We use the print driver, which once you understand the software sends bulk letters very easily at a greatly reduced overall cost. Docmail are very helpful in resolving any issues that crop up. I'm looking forward to trying to utilise the API that docmail offer."

Chawton House Surgery

"It's a brilliant service and it not only saves time in that we no longer need to print the letters, stuff envelopes

VISION

Shawlands Surgery

"Docmail has provided an easy to use solution for individual and bulk mailings. It was useful towards QOF year end to send bulk invitation letters and patient information letters. The system is easy to use and saves more than 50% of the total cost of sending a letter, I assumed there must be a catch, but there really isn't!"

North Glen Medical Practice

"Docmail is a great way to automate our letters which are sent from the

from it too - in fact, I have already recommended it to our local CCG Cluster and Practice Manager Forum."

"We started using Docmail a couple of years ago to help reduce the burden of doing large mailings, and almost instantly we could see its appeal.

"Docmail has saved money, staff hours and elbow grease and once we learned how to format the documents and spreadsheets, it really was plain sailing.

"So far, I would estimate we have saved days in staff hours and therefore hundreds of pounds using Docmail for large runs - it's much more efficient than the more traditional method. For example, our flu campaign alone saves over £800 and by using EMIS Web searches cleverly; we can combine runs to offset costs even further."

or take to the Post Office, but saves money as well in terms of the cost of paper, envelopes, toner etc."

Portesham Surgery

"We have used Docmail in our practice for the last five years, after I spent a whole morning on my knees stuffing envelopes with our flu invitation letters and realised there were better ways of spending my time!

"We tend to use it for mass mailings, including our flu invitations, but also towards year end to mail patients who are missing something like a recent blood pressure reading. The saving through using Docmail really helps and means we can afford to do more mailings, which brings more patients in for vital checks and monitoring whilst hopefully increasing our QOF performance."

Castle Mead Medical Centre

"Docmail is an easy and simple to use system that has saved our practice time and money."

Practice to our Patients. Once set up, the system is really easy to use and costs are saved through not having to use our own ink and paper."

St Bartholomew's Medical Centre

"Docmail is very cost and time effective and enables us to bulk mail with the minimum of effort."

Sunnyside Medical Centre

"Docmail is a brilliant system to use. Within a matter of weeks, we were able to train all the administration team and secretaries to use the system. Only one member of staff needs to set everything up, from the headed paper, to uploading templates; this is beneficial as once everything is uploaded and set up, it is all there ready for the other users to use.

"Docmail has made mailing letters a lot easier across the surgery, no need to sit at your desk for hours folding letters and sticking stamps."
